

# EV TIME-OF-USE RATE FACT SHEET

GO ELECTRIC WITH TRICO

SIMPLE. INNOVATIVE. ELECTRIC.

## WELCOME TO TRICO'S EV TIME-OF-USE RATE

Thank you for signing up for Trico's voluntary Electric Vehicle Time-of-Use Rate (EV TOU Rate). This rate is designed to support the growing demand for EVs among Trico Members, reduce strain on Trico's system during peak hours, and lower costs for Trico's overall membership.

## WE ARE HERE TO SERVE YOU

"As a not-for-profit cooperative, Trico is committed to providing our Members with sustainable and cost-effective energy solutions, and that means our EV strategy starts with you, our Member."

**BRIAN HEITHOFF**  
CEO & General Manager, Trico

### COMMUNITY BENEFITS

You are supporting the reliability of our grid and helping keep costs low for all Members by signing up for this rate.

### SAVE MONEY

As a Member with this rate, enjoy a 49% rate reduction on up to 400kWh of energy when charging your EV between 10:00 PM and 5:00 AM.

### SUSTAINABILITY

Sustainable energy solutions are part of our mission. Your participation in this rate allows us to better serve EV demand and your needs.

# FREQUENTLY ASKED QUESTIONS

## 1. HOW MUCH MONEY WILL I SAVE?

You will receive a 49% rate reduction when charging your EV between the hours of 10:00 PM and 5:00 AM (on up to 400 kWh of energy).

## 2. WHEN WILL MY RATE BEGIN?

The EV TOU Rate will go into effect on your account at the start of your next billing cycle. That means you will not see the rate on your next bill. Instead, it will be on the bill for your next full billing cycle.

## 3. WHERE WILL MY RATE APPEAR ON MY BILL?

Your new rate will show on your energy bill as a credit of the difference between Trico's standard rate of \$0.131 per kWh and the EV TOU Rate of \$0.065 per kWh. This is where you will see how much money you've saved by using the EV TOU Rate.

## 4. WHY IS IT IMPORTANT TO CHARGE DURING THESE HOURS?

The cost Trico pays for power is dependent on its overall system peak (the moment in time when consumption of energy on Trico's system is at its highest). Trico's system peak varies throughout the year, but it never falls between 10 pm and 5 am. By encouraging EV charging in that period, we can limit the overall costs for all Trico Members and reduce stress on our grid. As a non-profit cooperative this rate is an innovative way we can offer Members who own EVs savings and benefit the entire Trico membership.
